SHEEP IRELAND MULTIBREED LAMBPLUS RAM SALE

Tullamore Livestock Mart, Tullamore, Co. Offaly

on Saturday 26th August 2017

at 12.00 noon.

CONDITIONS OF SALE

1. The highest bidder to be the purchaser, subject to paragraph 3, and if any dispute should arise between two or more bidders then the lot in dispute to be put up again and re-sold, or the auctioneer may declare the purchaser.
2. Purchaser to give their names and place of abode in advance of the sale. A unique purchaser number will be assigned to each purchaser before sale commences. Purchaser is responsible for payment for relevant lot upon the fall of the hammer.
3. All lots to be cleared away at the buyers expense at the close of the sale, to be at the risk of the purchaser from the time the lot is sold and to be taken with all faults and errors of description.
4. All animals are sold as they stand and the purchaser is deemed to have examined each animal and fully satisfied himself/herself about the sheep prior to the sale.
5. Sheep to be sold in euros and fees to be charged to purchasers.
6. The sellers and the auctioneers hereby excluded have described the sheep to the best of their ability and knowledge, any express or implied conditions, warranty or representation statutory or otherwise.
7. Sheep will be sold in the order in which they appear in the catalogue.
8. Re runs: First 4 lots of the sale in each sales ring can be re-run before the 2nd breed category commences. No additional re-runs will take place throughout the sale.

*Buyers are advised to inspect thoroughly prior to purchasing.

Important: The sales inspectors will inspect and reject any sheep which in their opinion are unfit for sale.

Important: The Pedigree Information printed in this catalogue is as supplied by or on behalf of the breeder. The responsibility for the accuracy of the information therefore rests solely with the breeder and not Sheep Ireland.

Sheep Ireland EuroStars

How to select a ram fit for purpose?

Evaluations should **never be the only tool** you use when selecting animals for breeding. Animals must also be examined to ensure the animal is also physically correct; an animal that is not physically correct (ie. mouth, feet, etc.) cannot compensate for this fault regardless of its evaluation and should be avoided for breeding purposes.

EuroStars – How to interpret them

- Each star represents where the animal ranks on each index in 20% bounds
- **One star** represents the **bottom 20%** of the breed
- **Five star** represents the **top 20%** of the breed
- The higher the stars, the higher the predicted profitability of that animal

Rank

- This figure indicates more precisely where the animals rank within the breed. eg. Top 11% (see example below)
- This is displayed with the black pointer, the further to the right these are on the scale, the better its position with the breed.

Acc % (Accuracy%)

- This figure is very important as it represents the amount of data behind each evaluation. Where Acc is low, much less emphasis should be placed on the evaluation, and vice versa.
- This is displayed with the grey pointer, the further to the right these are on the scale, the more information this evaluation is based on. e.g. Acc 43% (see example on previous page)

Acc % parameters

V.Poor, 0% - 14% **Poor**, 15% - 24%

Fair, 25% - 34% **Good**, 35% - 49%

V.Good, 50% and above

Indexes & Traits

- 1) Replacement (€1.126)** – If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 2) Terminal (€0.542)** – If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 3) Lamb Survivability** – This ranks animals based on lambing ease and lamb survival rate. Every positive % point on this index is an extra lamb surviving to 40 days and vice versa.
- 4) Days to Slaughter** – This ranks animals on their genetic ability to grow. The index associated with this trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other animals of the same breed.
- 5) No. of Lambs Born** – This ranks animals based on the predicted prolificacy of the females from this animal compared with other animals of the same breed.
- 6) Daughters Milk** – This ranks animals based on the predicted milking performance of their daughters compared with other animals of the same breed.

RamSearch.ie

The Sheep Ireland Online Ram search is also available at ramsearch.ie, you can use this tool to get the most up to date evaluations for a ram, to **search for rams by county, breed and current evaluation ratings**.

Contact Us

Find out more about EuroStar rams, LambPlus or the Online Ram search you can visit www.sheep.ie, E-mail query@sheep.ie, or Call us on **1850 601 901**
