**Sheep Ireland  
Guide &  
Directory of  
Breeders**

# Chairperson's Message

2022 has already seen many improvements within Sheep Ireland. High EuroStar rams continue to deliver higher profits in validation work being carried out. Genotyping of pedigree sheep across Ireland continues to grow at pace. Sheep Ireland continue to build the services available to all Irish farmers, via the online ram search, free data recording app and a greatly improved ram sale catalogue format. Most importantly, national genetic trends are on an upward trajectory which bodes well for Irish sheep farmers.

James Murphy - Chair of the Sheep Ireland board, sheep farmer from Kilkenny, Charollais pedigree ram breeder and former chairman of the IFA sheep committee.

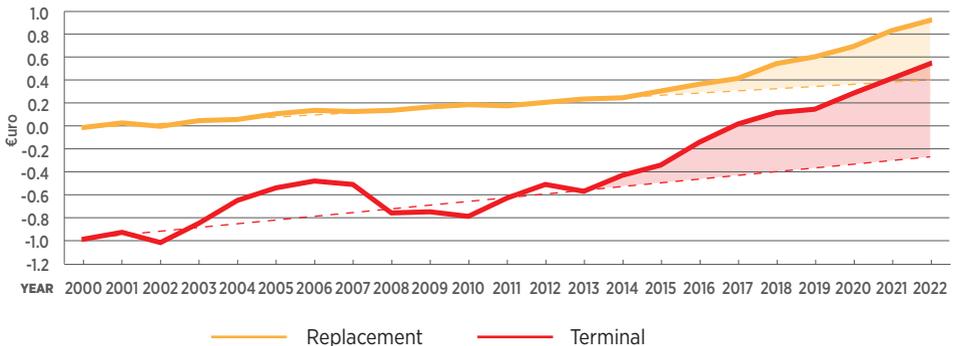

## IRELANDS GENETIC PROGRESS CONTINUES TO GROW

Sheep Ireland, along with our industry partners, is improving the profitability of Sheep farms by identifying and promoting the use of better sheep genetics.

An independent analysis carried out by AbacusBio ([www.AbacusBio.com](http://www.AbacusBio.com)) recently demonstrated that permanent genetic improvement delivered by Sheep Ireland, from 2014 to 2020, has been worth €17m and will provide an additional €61m benefits over the next 20 years (as animal performance is now permanently higher). If the rate of genetic gain

continues to increase, Sheep Ireland will deliver a further €51m to the industry over the next 20 years.

Sheep Ireland launched the Replacement and Terminal Indexes in 2013. The areas shaded in Orange and Red highlight the increase in genetic gain since then. With the increased adoption of genomics by breeders in 2022, it is expected that the rate of genetic improvement will significantly increase as breeders can make more accurate breeding decisions leading to increased farmer confidence in the Indexes.

Ireland's sheep industry genetic trend for both Terminal and Replacement Indexes

# Irish Sheep Breeding

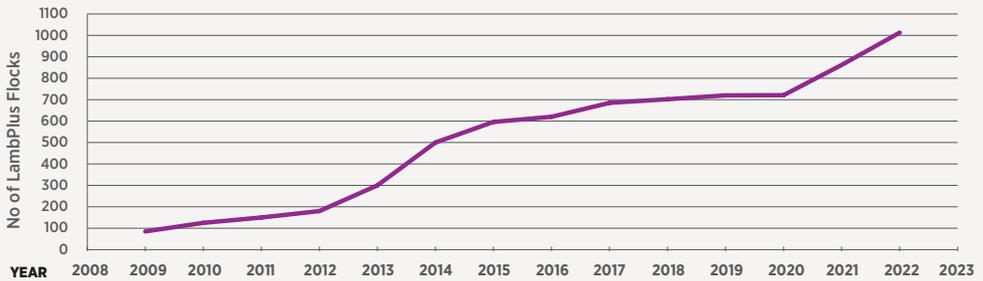

## Ireland's sheep in numbers

- 36,163 active sheep farmers – DAFM 2021 sheep census
- 2,697,892 breeding ewes – average of 75 per farmer
- 86,216 breeding rams – 2.4 rams per farmer
- 25,000 replacement rams needed annually in Ireland

## NO. OF LAMBPLUS FLOCKS BY YEAR

— No of LambPlus Flocks

The number of ram breeding flocks joining the LambPlus performance recording programme has grown every year since the beginning of Sheep Ireland. Performance recording is now at its highest level ever in Ireland which bodes well for all Irish sheep farmers.

## CURRENT SOURCE OF IRISH RAMS ANNUALLY

25,000 rams required annually

\*Other sources include; non-pedigree rams, crossbred rams, rams with unknown ancestry etc

# Working to improve resilience and efficiency

Sheep Ireland in association with our industry partners are working to improve the resilience and efficiency of the national flock for the benefit of the entire industry.

## **Growth & Carcase**

Increasing lamb growth rate through the Days to Slaughter Index. Indexes for carcase confirmation and fat also in place. See pages 10& 11 for more on the EuroStar indexes.

## **Prolificacy**

Ewe prolificacy (number of lambs born) is a key driver of farm profitability. The Sheep Ireland NLB breeding value is being used to improve this trait nationally.

## **Ewe Barrenness**

Sheep Ireland have an index to reduce the level of ewe barrenness in the Irish sheep industry.

## **Health Traits**

We now have breeding values for Lameness and Dagginess (dirty back ends). View these breeding values on the Sheep Ireland online ram search.

## **Lamb Vigor at birth**

This trait can now be viewed on the Sheep Ireland online ram search.

## **Lambing Difficulty**

Sheep Ireland are identifying bloodlines with less cases of lambing difficulty.

## **Emissions**

Reducing Green House Gas emissions from sheep. The GrassToGas international collaboration project will produce breeding values to breed more GHG friendly sheep.

### **Worm Resistance**

A new project called OviFEC will collect thousands of Faecal Egg Counts over the coming years with the objective of producing breeding values for Irish sheep farmers. These breeding values will help to select animals that are more resistant to worms.

### **Lamb Survival**

This trait appears in all sales catalogues and forms part of the Replacement Index See pages 10& 11.

### **Ewe Mothering Ability**

This trait can now be viewed on the Sheep Ireland online ram search.

### **Ewe Milk**

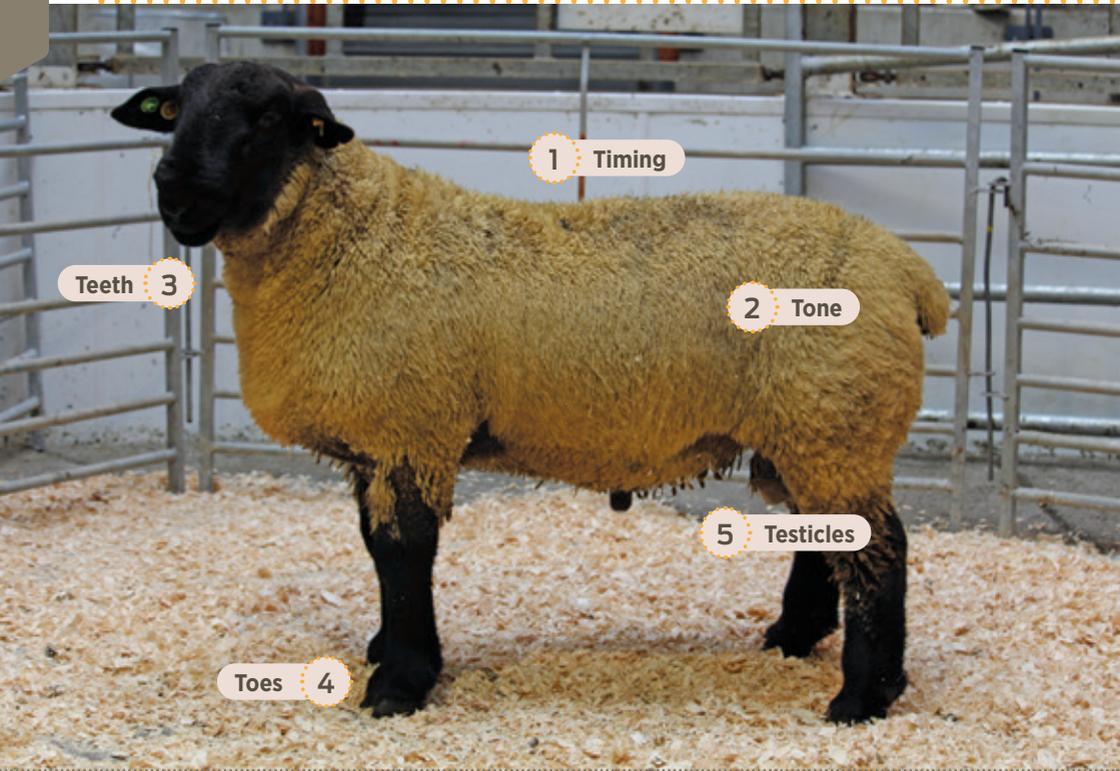

The Daughters milk trait helps farmers to select milkier ewes.

### **NEW BREEDING VALUES**

Sheep Ireland are now displaying breeding values for 10 new sub-traits for all performance recorded rams. View these via the online ram search ([www.ramsearch.ie](http://www.ramsearch.ie)).

# Physical Checks and EuroStars Must Go

Regardless of what EuroStar Index a ram may have, if the ram is not physically correct, he will not perform as he should. All farmers should carry out a ram NCT (check) on all existing stock rams and rams being considered for purchase. There are five basic things all sheep farmers should consider – these can be summarised as the 5 T's.

## 1. Timing

Rams should be assessed at least 10-12 weeks prior to breeding for body condition score and to identify any other potential problems. Early detection of physical issues provides a farmer with a chance to get the ram ready for the breeding season.

## 2. Tone (Condition)

A ram should be in good condition for the annual breeding season. A target condition score of 4 will ensure that the ram is fit and not over fat. Rams will lose some condition over the course of a busy breeding season, so farmers need to ensure that rams are in adequate condition before mating begins.

# Hand In Hand - Ram NCT

## 3. Teeth

All breeding ram's teeth should be checked annually. This check should extend to the overall mouth including the molars (side teeth), which should be checked by rubbing the outside of the rams cheeks for bumps/abscesses etc. Correct teeth/mouths are particularly important if replacement females are being retained from an individual breeding ram. Rams with teeth/mouth issues will struggle to maintain body condition and are not likely to perform to their potential.

## 4. Toes

Checking a ram's toes pertains to checking his feet and legs. Addressing lameness issues is one of the key reasons to assess rams 10-12 weeks before breeding. This will allow time to address any potential issues. Consider culling persistently lame rams and try not to retain daughters as replacements. Rams should have four strong, straight legs. The hind legs are particularly important when it comes to a ram's ability to mate. Check the brisket/chest

of all rams for sores as these are very likely to dissuade the ram from mating successfully.

## 5. Testicles

Checking rams' testicles is another critical part of the NCT. Bigger is generally better as these rams will generally produce more sperm. The most important thing however to check is that there are two testicles present. A ram can be fertile with a single testicle, but it may affect the number of ewes he will mate during the breeding season. The ram's testicles should be loose and free from abnormal lumps/bumps. If checking the testicles appears to be causing the ram obvious pain, then this should be investigated closer by a vet. The epididymis (appendage below the testicle) where semen is stored, should be similar in size to a golf ball, and free from lumps. A ram's penis area should also be checked for any obvious signs of injury or infection.

## FINAL PHYSICAL CHECK

If possible, at mating time, try to spend time watching rams with the ewes. Ensure that the ram is successfully mating with the ewes. All breeding rams should be raddled on their chest area or fitted with a crayon harness to mark each ewe as they are being mated. These raddle/crayon colours can then be changed on the ram/s in advance of the ewes second oestrus cycle (day 14/15 after initial ram introduction). A high number of ewes being marked by the second raddle/crayon will help to identify a fertility issue. If using a team of rams in the same group, it will be difficult to identify an issue with an individual ram. If single sire mating, a ram fertility issue will be obvious using the raddle/crayon. Speak to your agricultural advisor or vet about any breeding issues that you may be having on your farm.

# Become Quality Assured with Bord Bia

Through the Sustainable Beef and Lamb Assurance Scheme (SBLAS), Bord Bia can provide proof to customers of the high standards of Irish beef and sheep farming.

To help Irish lamb stand out from our competitors, we need sufficient supplies of Quality Mark lamb all year round.

For that, we need your participation.

Speak to Bord Bia today, on 01 5240410 to find out how you can join SBLAS and become Quality Assured.

**Bord Bia Helpdesk:**  
**Open Monday to Friday, 9am to 8pm.**

**Visit: [farm.bordbia.ie](http://farm.bordbia.ie)**

**60%** of Ireland's national sheepmeat throughput is **Quality Assured**.

**68% of shoppers\*** said they were more likely to buy lamb that carried the Bord Bia Quality Mark.

\*Coyne Research (2021), 1000 grocery shoppers, aged 18+

**BORD BIA**  
IRISH FOOD BOARD

# Finding €uroStar Rams

Locating a €uroStar ram has never been easier. The availability of rams continues to grow each year as more and more pedigree ram breeders engage in performance recording. We are now at the highest level of sheep performance recording ever seen in Ireland.

## Breed society ram sales

All pedigree sheep breed society sales will have €uroStar evaluations included in their sales catalogues, but we would always recommend that you contact the relevant breed society in advance of any society ram sale to ensure that this is the case. A list of society contacts can be found in this directory.

## Online ram and breeder searches

The Sheep Ireland online ram and breeder searches can be found on [www.ramsearch.ie](http://www.ramsearch.ie) or on the Sheep Ireland homepage ([www.sheep.ie](http://www.sheep.ie)). These search facilities are a great source of information for anyone trying to source a breeding ram in Ireland.

Rams can be searched for based on breed, location, age and €uroStar index value. The breeder search facility allows users to search for performance recording ram breeders in 2022 by breed and county.

## Directory of LambPlus breeders

A full list of LambPlus performance recording breeders can be found at the back of this publication. These breeders have €uroStar rams available for sale in 2022.

## Sheep Ireland Multi-Breed ram sale

This sale takes place on the fourth Saturday of August each year. In 2022 it will take place in Tullamore Mart on Saturday August 27th. Some of the best sheep genetics in the country are presented for sale here annually. This sale is Ireland's largest catalogued ram sale. A sales catalogue for this annual sale is available via the Sheep Ireland website approximately a week in advance of the sale itself.

Take a picture of this QR code on your smartphone to go directly to the online Sheep Ireland Ram Search.

# Understanding the €uroStars 2022

**CPT Sire** - This ram was progeny tested in the Sheep Ireland CPT (Central Progeny Test) and a large volume of commercial data is contributing to its genetic evaluation.

**Flock DQI** - Data Quality Index scores flocks on their data quality, quantity and timeliness.

**M&F Scanned** - This flock has been visited by Sheep Ireland and lambs have been weighed and scanned for Muscle & Backfat.

**Animal Lot number and IDs**  
- Name, Pedigree ID & NSIS

**Animal details** - DOB, Breed, Sex & Birth Rank

**Animal breeder & owner details**

**Animals Sire**

**Animals Dam**

**Replacement (€3.77)** - If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

**Lot 1: ARROW A1922023, IE041234501234D**  
 DOB: 03-JAN-2022 • Charollais • Male • Triplet • CPT Sire • M&F Scanned  
 Breeder: JOHN MURPHY • Enniscorthy, Co. Wexford • DQI: 62  
 Owner: ANDREW FARMER • Edenderry, Co. Offaly • DQI: 87%

<b>TULLY FRANCO</b> B1214111, IE044308902930C	<b>Grandsire</b>
<b>BALLY</b> A1215097, IE044308903081B	<b>Granddam</b>
<b>Sire: TOMGARROW • CPT Sire</b> J1721023, IE044554806184D	
<b>Dam: ARROW</b> J6319016, IE044554805885A	
<b>ENCORE UN FOIS • CPT Sire</b> GAI12073, IE044164300981E	
<b>ARROW</b> J6317017, IE044554805425E	

**Comment: Sire of this ram was Premier Champion 2021**

**Lamb Survivability**  
- This ranks animals based on lamb survival rate. Every positive % point on this index is an extra lamb surviving to 48hrs after birth.

**Days to Slaughter** - This ranks animals on their genetic ability to grow. This trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other.

### Parentage DNA Verified -

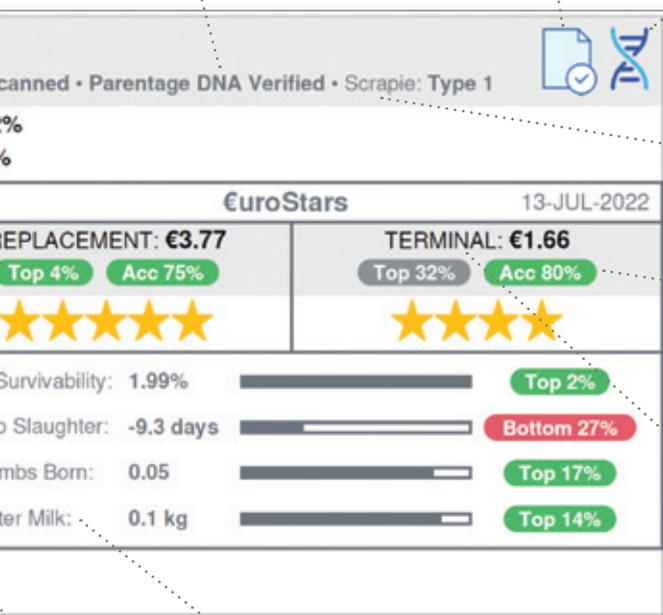

Where this message is displayed on a catalogue, the sheep in question has been genotyped and its parentage has been proven to be accurate based on its DNA. Both parents need to be genotyped to allow parentage verification to take place.

### Commercial Data -

This animal's genetic evaluation contains commercial farm data collected from Sheep Ireland/Teagasc projects or other commercial farms.

### Genotyped -

This animal has been genomically tested via Sheep Ireland. A genotyped animal will have a genomic evaluation which significantly improves the accuracy % of the EuroStar indexes.

### Scrapie -

This indicates the level of scrapie resistance based on the animal's genotype. This scrapie result is DAFM approved for export once the animal is fully parentage verified.

### Acc -

See next page to see the importance of 'Acc%' which is an abbreviation of Accuracy.

### Terminal (€1.66) -

If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

### No. of Lambs Born -

This ranks animals based on the predicted litter size of their daughters.

### Daughters Milk -

This ranks animals based on the predicted weight difference of their lambs based on the milking performance of their daughters compared with other animals of the same breed.

# Key Elements of the €uroStar Indexes

## ACCURACY % - KEY FIGURE

The accuracy % attached to €uroStar evaluations is an extremely important piece of information that farmers should pay a lot of attention to. Accuracy % is displayed for each individual index and represents the amount of data behind that specific index. Where Accuracy % is Poor (less than 35%) a considerably lower emphasis should be placed on the evaluation information, however where Accuracy % is very good (60%+) a considerable emphasis can be placed on the evaluation when making a breeding decision.

### TOP TIPS ON ACCURACY %

- Purchase rams with as high an accuracy% as possible
- Purchase genotyped rams
- Purchase from high Data Quality Index (DQI) LambPlus ram breeders
- Purchase rams that have Central Progeny Test (CPT) data in their background.

## DQI – DATA QUALITY INDEX

**Lot 1: ARROW** A1922023, IE041234501234D  
DOB: 03-JAN-2022 • Charollais • Male • Triplet • CPT Sim • Percentage DNA Verified • Scrapie: Type 1

**€uroStars** 13-JUL-2022

<b>REPLACEMENT: €3.77</b> Top 4% Acc 75%	<b>TERMINAL: €1.66</b> Top 32% Acc 89%
---	---

The Data Quality Index (DQI) scores LambPlus flocks on the quality, quantity, and timeliness of their data recording throughout the year. The DQI appears as a % figure on all €uroStar sale catalogues and on the Sheep Ireland online breeder and ram search found at [www.sheep.ie](http://www.sheep.ie).

**The three main elements of the DQI are as follows;**

- **Quality** – Does the data demonstrate realistic variation across the various traits being recorded, ie lamb mortality, lambing difficulty, lamb weights etc. For all traits, there are expected levels of variance and these are a great indicator of data quality.
- **Quantity** – Has the breeder recorded all the required data for their flock, ie lambing information for all ewes, weights for all lambs born etc. Thorough data recording is beneficial to the users of the €uroStars as it maximise the accuracy % of the indexes.
- **Timeliness** – Has the breeder submitted their data to Sheep Ireland in a prompt manner. Prompt entry of data to Sheep Ireland reduces the risk of data error and/or loss. Late data entry has the potential to cause index movements moving into the ram sale season which is very undesirable for both ram breeders and ram buyers alike.

# FBD LambPlus Breeder Awards

Since 2018, Sheep Ireland, with FBD's kind support have been recognising ram breeding flocks leading the way in terms of genetic progress and commitment to performance recording. LambPlus ram breeders are ranked based on their flock linkage, DQI, Euro-Star values and index accuracies which is then followed by an interview by a member of the Sheep Ireland board to gain further insight into the breeding strategies and performance recording practices of the top flocks.

The two award categories are the 'Highest Achieving LambPlus flock' and the 'Most Improved LambPlus flock'. Three nominees for each award are selected annually and the overall winners are announced at the Sheep Ireland Genetics conference. The results of the 2022 awards were as follows;

## 2022 Highest Achieving LambPlus flock

Nominees	
<b>Liam &amp; Eoin Dunne (Tubber Belclares) - Award Winner</b>	<b>Co. Offaly</b>
Liam Delaney (Coolcarragh Belclares)	Co. Kildare
Michael & Sarah O'Neill (Bolinaspect Charollais)	Co. Wexford

*Liam Dunne of Tubber Belclares  
(Highest achieving flock winner)*

## 2022 Most Improved LambPlus flock

Nominees	
<b>Christy, Margaret &amp; Brian Gallagher (Pullagh Texels) - Award Winner</b>	<b>Co. Sligo</b>
Michael Clarke (Ballyhine Suffolks)	Co. Wexford
William Hutchinson (Chapelizod Suffolks)	Co. Kilkenny

*Brian Gallagher of Pullagh Texels  
(Most Improved flock winner)*

Sheep Ireland would like to thank FBD for their generous sponsorship of the awards and we hope these awards will give a renewed motivation to all LambPlus ram breeding flocks to reach for the stars in 2023 and beyond. See below our previous nominees and winners for these awards!

## Previous Award Winners

2020	Maria Philpott (Duhallow Charollais) - Co. Cork	Highest Achieving
2020	Enda Turley (Newbridge Texels) - Co. Westmeath	Most Improved
2019	Larry Barrett (Kilmeany Belclares) - Co. Carlow	Highest Achieving
2019	John Renehan (Violet Hill Belclares) - Co. Kilkenny	Most Improved
2018	Anne Murphy (Foundry Texels) - Co. Wexford	Highest Achieving
2018	Ornaith Clarke (Trojan Texels) - Co. Meath	Most Improved

# Ram Purchasing Advice

Michael Gottstein – Head of Teagasc Sheep Knowledge Transfer

Ram buyers should manage purchases very carefully in the initial weeks. A change of environment and feed can cause upset for any animal, especially for young animals. As a result, management of newly purchased rams needs to be optimal.

## Practical tips when buying rams

- **Buy early** – Allow rams some time adjust to their new surroundings and feed. If using rams as a team in one group of ewes, they should be familiar with each other rams in advance of mating.
- **Ram history** – Talk to the seller of your ram. Ask about health treatments, vaccinations, any specific farm issues, lameness etc.
- **After purchase care** – Quarantine the ram for a period to assess for diseases such as CODD, scab etc. Treat any purchased sheep for stomach worms/scab with two injections of Ivermectin, 7 days apart and a fourth-generation wormer (Zolvix/Startect) to prevent the importation of anthelmintic resistant worms. On wet farms a double treatment for fluke (two different products effective against immature fluke) will also help to guard against anthelmintic resistant liver fluke.
- **Vaccinate all purchased rams** against Clostridial diseases and pasteurella as per your own flock health protocol. Do not assume that the previous owner has done this. This will require two injections four to six weeks apart. One dead ram will pay for a lot of vaccine.
- **Feeding** – The ram is very likely to have been fed concentrates in advance of sale (discuss with the seller). If a ram has been fed before sale, this feeding should continue for a period and wean off gradually.
- **Fertility** – To identify fertility issues raddling the chest of the ram is critical. Use a crayon and harness or raddle paste. Change colour every 7-14 days to detect ram fertility problems ASAP. Ideal colour sequence is Yellow, Orange, Green, Red, Blue and finally Black. Bucket feeding rams will facilitate applying raddle more easily, reducing the need to unnecessarily disturb ewes.
- **Fertility contd.** – A raised body temperature will kill any semen in the testes. Antibiotic treatment will not kill semen but will help to address the infection which is causing a high temperature. It can take semen up to 8 weeks to replenish if killed by a high temp.
- **Ram to ewe ratios** – Typically ram lambs should not be overworked in their first year, mating with no more than 25 ewes (hogget rams up to 40 ewes). Avoid running ram lambs alongside mature rams as this may risk injury and/or bullying.
- **Existing rams on the farm** – Carry out a physical assessment/NCT well in advance of mating (12 weeks or more). Ask yourself; what rams will I need this year? Can I avoid inbreeding using my current rams? Are all current rams fit for purpose (in good health etc)? Rams in poor condition will take considerable time to build body weight, so time is critical.

# Validation of the €uroStar Indexes

## Do Sheep Ireland genetic evaluations work for maternal traits?

Niamh Barry<sup>1,2</sup>, Deirdre Purfield<sup>2</sup>, Fiona McGovern<sup>3</sup>, C. Murphy<sup>2</sup>, Thierry Pabiou<sup>4</sup>, Kevin McDermott<sup>4</sup>, Noirin McHugh<sup>1</sup>

<sup>1</sup> Animal & Grassland Research and Innovation Centre, Teagasc, Moorepark, Fermoy, P61 C996, Co. Cork;

<sup>2</sup> Munster Technological University, Cork Campus, Bishopstown, T12 P928, Cork;

<sup>3</sup> Teagasc Animal & Grassland Research and Innovation Centre, Mellows Campus, Athenry, H65 R7, Co. Galway

<sup>4</sup> Sheep Ireland, Link Road, Ballincollig, P31 D452, Co. Cork.

## Data

To assess the usefulness of the genetic indexes in detecting differences in performance between animals performance data across a range of key areas including: lambing, lamb performance, ewe performance & health traits (dagginess) recorded between 2017 and 2021 were extracted from the Sheep Ireland database; the data consisted of both crossbred (28%) and purebred (72%) animals. The number of records available differed per trait but varied from 105,248 to 37,587 records. To quantify the accuracy of the Irish maternal genetic evaluations for improving maternal traits in the national flock, individual animal breeding values for maternal traits were compared to performance on farm for the same trait.

## Results

Results show that 5 star ewes across a range of maternal traits had greater reproductive performance on farm. Ewes with a 5 star rating for fertility (i.e. the number of lambs born breeding value) produced, on average, an additional 0.38 lambs per lambing compared to a ewe of 1 star for the number of lambs born breeding value. Although 5 star ewes produced a 0.23 kg heavier lamb at birth, 5 star ewes had experienced lower levels of lambing difficulty

(10% less lamb dystocia) compared to ewes of 1 star for the relevant trait. Lower lamb mortality was also associated with ewes of 5 star rating for lamb survival, on average, 5% more lambs survived at lambing compared to 1 star ewes. Greater growth rates were also seen with lambs born to 5 star ewes both at pre-weaning and weaning with lambs born to 5 star ewes 0.64 kg and 1.62 kg heavier at pre-weaning and weaning compared to lambs born to 1 star ewes, respectively. Animals of 5 star rating also had a lower dag score (0.56 score) compared to animals of a 1 star rating.

Trait	5 Star	1 Star	Difference
Number of lambs born (1 to 4)	2.07	1.69	0.38
Lambing dystocia (%)	19%	29%	10%
Lamb survival (%)	91%	86%	5%
Birth weight (kg)	4.66	4.43	0.23
Weaning weight (kg)	36.99	35.37	1.62
Dag score (1-5)	1.51	2.07	0.56

Table 1. On farm performance of animals differing in star ratings for key performance traits for lambing, lamb performance and health traits.

## Conclusion

Results from this research indicate that selection of breeding animals for favourable maternal genetic attributes will result in favourable improvements in performance and profitability at farm level. Genetic evaluations are an important tool for sheep farmers to make more informed breeding decisions for increasing farm profitability.

# Hill Sheep Breeding – A New Era

In recent years Sheep Ireland have been working with hill ram breeding groups and key industry stakeholders to advance Irish hill sheep breeding. The establishment of flockbooks (ancestry recording) is the critical first step.

Sheep Ireland are currently working with all known Irish hill ram breeding groups to genotype the stock rams within their respective member flocks. This foundation will allow any future progeny to be genotyped and assigned a definite sire (sire verified) via genomics.

## The benefits of hill parentage recording;

- Track various bloodlines (good and bad)
- Help protect against inbreeding
- Protect the integrity of regional/local strains of hill sheep populations
- Open the door to performance record and receive EuroStar evaluations

## Genomics (DNA) presenting new options

Recording parentage on hill flocks can be very difficult given that flocks generally lamb outdoors. Matching a dam at birth is made very difficult in this situation. Identifying the sire of lambs is impossible for most hill ram breeders, given that mating involves a large number of rams running with ewes across large areas.

Genomics can now solve this parentage issue. Once a DNA sample is collected from a lamb and both of its parents, genomic technology can assign parentage with 100% accuracy based on this DNA information.

## Additional benefits of genotyping hill rams

- Receive an 'Inbreeding Coefficient' for each genotyped sheep (% of inbreeding in the sheep)
- Find out the scrapie genotype (level of scrapie resistance) for each genotyped sheep
- Receive genomic EuroStar evaluations for each genotyped sheep
- Future DAFM sheep schemes (see below)

## DAFM Sheep Improvement Scheme

Following on from the current Sheep Welfare Scheme (SWS), the Irish Department of Agriculture plans to launch a follow-on to this scheme in 2023. The new Sheep Improvement Scheme (SIS) proposes a number of tasks, many similar to the SWS, with some new proposed additions. Crucially for hill sheep breed improvement the proposed scheme will promote the purchase of 'Sire Verified' hill rams.

Once this scheme launches Sheep Ireland will promote hill ram breeders selling Sire Verified rams in this publication annually, so we encourage interested breeders to contact us as soon as possible.
