Sheep Ireland Guide & Directory of Breeders

www.sheep.ie

Chairperson's Message

We've seen another incredibly busy year in Sheep Ireland with a number of hugely positive developments for Irish sheep genetic improvement. The launch of the DAFM Sheep Improvement Scheme (SIS) Genotyped ram option will take breed improvement to a new level. This task is particularly groundbreaking for our hill sector where a foundation will now be laid for future progress on the back of widespread sire genotyping taking place. Methane breeding indexes were launched in 2023 (only the 2nd country to do so). Work has also commenced on establishing breeding indexes for worm resistance. Genetic improvement across the key production traits continue on a positive trajectory. All this work is the result of ongoing close partnerships between key industry stakeholders DAFM,

Alex Clarke has been elected as the new chairperson of the Sheep Ireland board taking over from James Murphy. Alex is a pedigree Texel sheep breeder from Boyerstown in Co. Meath.

Teagasc, Meat Industry Ireland and Sheep Breed Societies all underpinned and supported by Irish sheep farmers. We look forward to another year of progress for Irish genetics, continuing to help improve farm profitability.

The Sheep Improvement Scheme (SIS): Genotyped Ram Action

The Sheep Improvement Scheme (SIS) Genotyped Ram Action presents a massive opportunity for the entire Sheep Industry to push its breed improvement to the next level for everyone's benefit.

For the Lowland sector, it will build on progress made over the last decade. The SIS will drive the rate of genetic gain by increasing the demand for animals with 4 or 5 Stars. With all the rams also needing to have a genomic evaluation, farmers can now be more confident than ever in the Star ratings of rams, and use them as a tool in their ram selection process.

For the hill sector, the SIS will help to establish a baseline in parentage recording, something that has been absent in any significant way to date. Parentage recording is the bedrock from which the sector can apply systematic breed improvement and monitor inbreeding.

Lowland Flocks Check List:

1. The Ram must be 4/5 Stars on the Replacement or Terminal Index at the time of purchasing
2. The Ram must have a Genomic Evaluation
3. The Ram must be Scrapie Type 1/2/3
4. The Ram must be purchased in the year the task is completed.

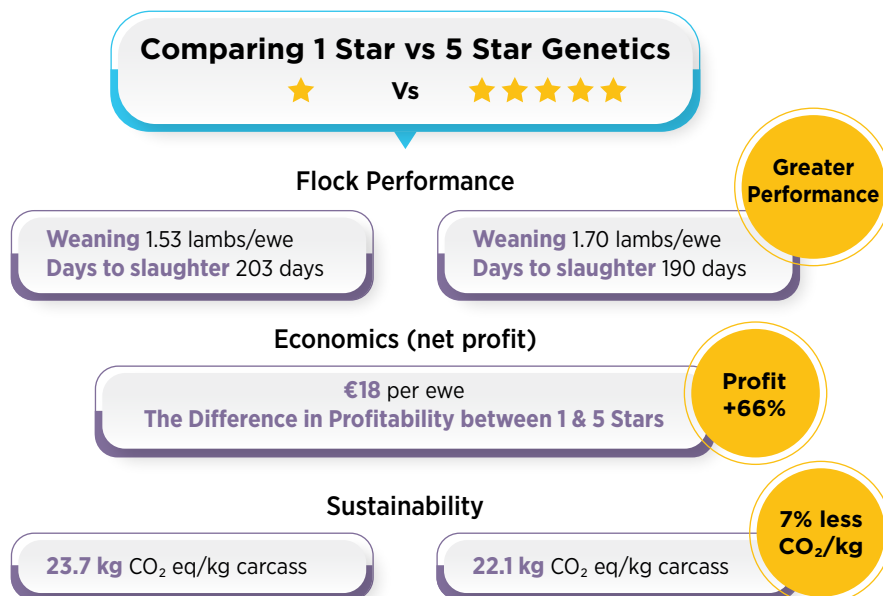

Hill flock Check List:

1. The Ram must be DNA Sire Verified by Sheep Ireland
2. The Ram must be a Hill Ram (Blackface Mountain or Cheviot Type)
3. The Ram must be Scrapie Type 1/2/3
4. The Ram must be purchased in the year the task is completed.

NOTE: The Lowland option is also available to Hill Flocks

€uroStars delivering...

*Data sourced from Sheep Ireland Central Progeny Test (commercial) flocks.

Understanding the €uroStars 2023

CPT Sire - This ram was progeny tested in the Sheep Ireland CPT (Central Progeny Test) and a large volume of commercial data is contributing to its genetic evaluation.

Flock DQI - Data Quality Index scores flocks on their data quality, quantity and timeliness.

M&F Scanned - This flock has been visited by Sheep Ireland and lambs have been weighed and scanned for Muscle & Backfat.

Parentage DNA Verified - Where this message is displayed on a catalogue, the sheep in question has been genotyped and its parentage has been proven to be accurate based on its DNA. Both parents need to be genotyped to allow parentage verification to take place.

Scrapie - This indicates the level of scrapie resistance based on the animals genotype. This scrapie result is DAFM approved for export once the animal is fully parentage verified.

Genotyped - This animal has been genotypically tested via Sheep Ireland. A genotyped animal will have a genomic evaluation which significantly improves the accuracy % of the €uroStar indexes.

Animal Lot number and IDs - Name, Pedigree ID & NSIS

Animal details - DOB, Breed, Sex & Birth Rank

Animal breeder & owner details

Animals Sire

Animals Dam

Replacement (€3.77) - If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

Lot 1: ARROW A1922023, IE041234501234D
 DOB: 03-JAN-2022 • Charollais • Male • Triplet • CPT Sire • M&F Scanned • Parentage DNA Verified • Scrapie: Type 1

Breeder: **JOHN MURPHY** • Enniscorthy, Co. Wexford • **DQI: 62%**
 Owner: **ANDREW FARMER** • Edenderry, Co. Offaly • **DQI: 87%**

SIS: Yes

€uroStars		13-JUL-2022
REPLACEMENT: €3.77	TERMINAL: €1.66	
Top 4% Acc 75%	Top 32% Acc 80%	
★★★★★		
Lamb Survivability: 1.99%	Top 2%	
Days to Slaughter: -9.3 days	Bottom 27%	
No. Lambs Born: 0.05	Top 17%	
Daughter Milk: 0.1 kg	Top 14%	

Comment: Sire of this ram was Premier Champion 2021

Commercial Data - This animals genetic evaluation contains commercial farm data collected from Sheep Ireland/Teagasc projects or other commercial farms.

SIS: Yes - Indicates that a ram is eligible for the DAFM Sheep Improvement Scheme

Acc - See next page to see the importance of 'Acc%' which is an abbreviation of Accuracy.

Terminal (€1.66) - If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

Lamb Survivability - This ranks animals based on lamb survival rate. Every positive % point on this index is an extra lamb surviving to 48hrs after birth.

Days to Slaughter - This ranks animals on their genetic ability to grow. This trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other.

No. of Lambs Born - This ranks animals based on the predicted litter size of their daughters.

Daughters Milk - This ranks animals based on the predicted weight difference of their lambs based on the milking performance of their daughters compared with other animals of the same breed.

Physical Checks and €uroStars Must Go Hand In Hand - RAM NCT

Regardless of what €uroStar Index a ram may have, if the ram is not physically correct, he will not perform as he should. All farmers should carry out a ram NCT (check) on all existing stock rams and rams being considered for purchase. There are five basic 'T's' that all sheep farmers should look at:

1. Timing

Handle all farm rams 10-12 weeks prior to breeding to identify any potential problems. This will allow time to address issues that might be present.

2. Tone (Condition)

A ram should be in good condition (target BCS of 4) in advance of mating. Giving access to good grazing or feeding some level of concentrates may be advised if rams are under condition.

3. Teeth

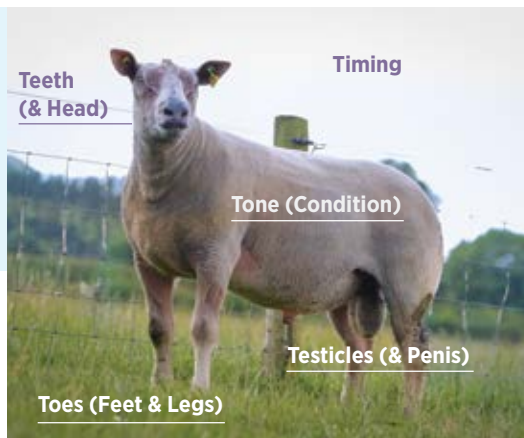

All breeding rams' teeth should be checked annually. Culling should occur where issues are identified. Avoid retaining females from such rams were possible.

4. Toes

Address lameness issues early. Cull persistently lame rams. Strictly avoid breeding replacements from rams with lameness issues. Check lame rams for sores on their chest. Sores in this area may prevent rams from mating ewes.

5. Testicles

Handle testicles to ensure they are free from

injury/swelling. Check the general penis area for signs of injury and infection also.

**Handling rams can be dangerous given their size. The above checks can be carried out without turning over rams and risking back injury. Best advice is to have some help at hand to restrain rams while the above checks are being undertaken*

FINAL PHYSICAL CHECK

Spend time watching rams with the ewes. Ensure rams are successfully mating with the ewes. All breeding rams should be raddled on their chest area or fitted with a crayon harness to mark each ewe as they are being mated. These raddle/crayon colours can then be changed on the ram/s in advance of the ewes second oestrus cycle (day 14/15 after initial ram introduction). A high number of ewes being marked by the second raddle/crayon will help to identify a fertility issue. Speak to your agricultural advisor about any breeding issues that you may be having on your farm.

Ram Purchasing Advice

Michael Gottstein – Head of Teagasc Sheep Knowledge Transfer

Ram buyers should manage purchases very carefully in the initial weeks. A change of environment and feed can cause upset for any animal, especially for young animals. As a result, management of newly purchased rams needs to be optimal.

Practical tips when buying rams

- **Buy early** – Allow rams some time adjust to their new surroundings and feed. If using rams as a team in one group of ewes, they should be familiar with each other rams in advance of mating.
- **Ram history** – Talk to the seller of your ram. Ask about health treatments, vaccinations, any specific farm issues, lameness etc.
- **After purchase care** – Quarantine the ram for a period to assess for diseases such as CODD, scab etc. Treat any purchased sheep for stomach worms/scab with two injections of Ivermectin, 7 days apart and a fourth-generation wormer (Zolvix/Startect) to prevent the importation of anthelmintic resistant worms. On wet farms a double treatment for fluke (two different products effective against immature fluke) will also help to guard against anthelmintic resistant liver fluke.
- **Vaccinate all purchased rams** against Clostridial diseases and pasteurilla as per your own flock health protocol. Do not assume that the previous owner has done this. This will require two injections four to six weeks apart. One dead ram will pay for a lot of vaccine.
- **Feeding** – The ram is very likely to have been fed concentrates in advance of sale (discuss with the seller). If a ram has been fed before sale, this feeding should continue for a period and wean off gradually.
- **Fertility** – To identify fertility issues raddling the chest of the ram is critical. Use a crayon and harness or raddle paste. Change colour every 7-14 days to detect ram fertility problems ASAP. Ideal colour sequence is Yellow, Orange, Green, Red, Blue and finally Black. Bucket feeding rams will facilitate applying raddle more easily, reducing the need to unnecessarily disturb ewes.
- **Fertility contd.** – A raised body temperature will kill any semen in the testes. Antibiotic treatment will not kill semen but will help to address the infection which is causing a high temperature. It can take semen up to 8 weeks to replenish if killed by a high temp.
- **Ram to ewe ratios** – Typically ram lambs should not be overworked in their first year, mating with no more than 25 ewes (hogget rams up to 40 ewes). Avoid running ram lambs alongside mature rams as this may risk injury and/or bullying.
- **Existing rams on the farm** – Carry out a physical assessment/NCT well in advance of mating (12 weeks or more). Ask yourself; what rams will I need this year? Can I avoid inbreeding using my current rams? Are all current rams fit for purpose (in good health etc)? Rams in poor condition will take considerable time to build body weight, so time is critical.

Sheep Ireland's Annual €uroStar ram sale

On the fourth Saturday of each August, Sheep Ireland holds its annual €uroStar ram sale. This year the sale takes place in Tullamore mart on Sat 26th August. This sale is now the largest catalogued ram sale in Ireland with over 400 catalogued entries hosted in 2022.

This year's sale will have the highest level of ram breeder entry criteria ever required to enter a ram sale, making the collection of rams and breeders on the day amongst the most elite in the country.

- Every Ram in the sale must be ranked in a 5 Star (Top 20% of the breed) on either the Replacement or Terminal Index.
- Every breeder is required to have a Data Quality Index (DQI) above 75%.
- Every ram must have passed a thorough physical inspection (in the past an average of 7% of rams have been rejected on the morning of the sale based on physical inspections).
- Every ram in the sale must have a Genomic Genetic Evaluation.
- Every ram needs to be fully Parentage Verified (DNA verified to both their Sire and Dam (New for 2023)).
- Each ram needs to be Scrapie Type 1,2 or 3 (in line with SIS requirements).
- Each breeder's flock in the sale needs to be genetically linked.

The above criteria will guarantee that all rams in the 2023 Sheep Ireland sale will be SIS eligible. In 2022 the sale hosted 10 different lowland sheep breeds so this is a sale not to be missed. To view past years catalogues and detailed sales reports, visit the Sheep Ireland website and click on 'Publications' & 'Ram Sales'

Become Quality Assured with Bord Bia

Through the Sustainable Beef and Lamb Assurance Scheme (SBLAS), Bord Bia can provide proof to customers of the high standards of Irish beef and sheep farming.

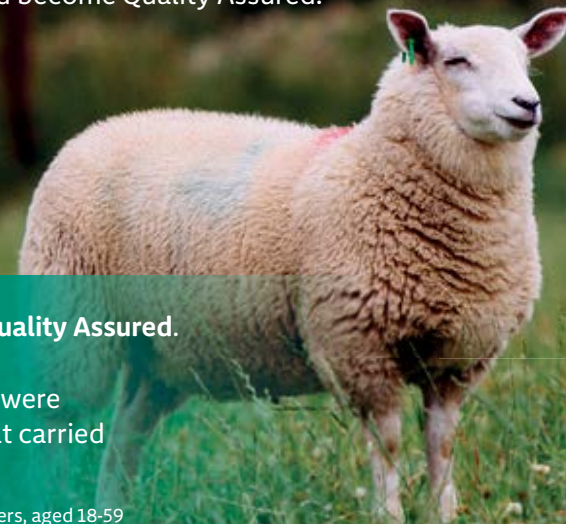

An increase in the number of Quality Assured sheep farms would ensure sufficient supplies of Quality Mark lamb all year round.

For that, we need your participation.

Speak to Bord Bia today, on **01 524 0410** to find out how you can join SBLAS and become Quality Assured.

Bord Bia Helpdesk:
Open Monday to Friday,
9am to 8pm.

Visit: farm.bordbia.ie

70% of eligible sheep are Quality Assured.

73% of shoppers* said they were more likely to buy lamb that carried the Bord Bia Quality Mark.

*Coyne Research, 1000 grocery shoppers, aged 18-59

Key Elements of the €uroStar Indexes

ACCURACY % - KEY FIGURE

The accuracy % attached to €uroStar evaluations is an extremely important piece of information that farmers should pay a lot of attention to. Accuracy % is displayed for each individual index and represents the amount of data behind that specific index. Where Accuracy % is Poor (less than 35%) a considerably lower emphasis should be placed on the evaluation information, however where Accuracy % is very good (60%+) a considerable emphasis can be placed on the evaluation when making a breeding decision.

TOP TIPS ON ACCURACY %

- Purchase rams with as high an accuracy% as possible
- Purchase genotyped rams
- Purchase from high Data Quality Index (DQI) LambPlus ram breeders
- Purchase rams that have Central Progeny Test (CPT) data in their background.

DQI – DATA QUALITY INDEX

Lot 1: ARROW A1922023, IE041234501234D	
DOB: 03-JAN-2022 • Charollais • Male • Triplet • CPT Sire • Parentage DNA Verified • Scrapie: Type 1

Owner: ANDREW FARMER • Edenderry, Co. Off.	DQI: 87%
EuroStars 13-JUL-2022	
TULLY FRANCO B1214111, IE044308902930C	REPLACEMENT: €3.77 Top 4% Acc 75%
BALLY A1215097, IE044308903081B	TERMINAL: €1.66 Top 32% Acc 60%

The Data Quality Index (DQI) scores LambPlus flocks on the quality, quantity, and timeliness of their data recording throughout the year. The DQI appears as a % figure on all €uroStar sale catalogues and on the Sheep Ireland online breeder and ram search found at www.sheep.ie.

The three main elements of the DQI are as follows;

- **Quality** – Does the data demonstrate realistic variation across the various traits being recorded, ie lamb mortality, lambing difficulty, lamb weights etc. For all traits, there are expected levels of variance and these are a great indicator of data quality.

- **Quantity** – Has the breeder recorded all the required data for their flock, ie lambing information for all ewes, weights for all lambs born etc. Thorough data recording is beneficial to the users of the €uroStars as it maximise the accuracy % of the indexes.
- **Timeliness** – Has the breeder submitted their data to Sheep Ireland in a prompt manner. Prompt entry of data to Sheep Ireland reduces the risk of data error and/or loss. Late data entry has the potential to cause index movements moving into the ram sale season which is very undesirable for both ram breeders and ram buyers alike.

Hill sheep breeding SIS unlocking a bright future

In recent years Sheep Ireland have been working with hill ram breeding groups and key industry stakeholders to advance Irish hill sheep breeding by trying to establish flockbooks (ancestry recording). DAFM recognise that hill flockbooks are the critical first step to helping hill breeders to make similar genetic gains to those being achieve in our lowland sheep sector.

and cannot use within their flock to minimize inbreeding. No longer will farmers have to roll the dice at ram sales each year, hoping to avoid purchasing bloodlines which are closely related to their breeding flock.

Genomics (DNA) – A new era for hill ram breeders

The traditionally way for ram breeders to capture the ancestry of each lamb born was to carefully record what ram mated to each ewe. At lambing time it is then necessary to tag each lamb born and record the relevant dam (mother). This level of data recording is impossible for most hill ram breeding flocks.

Why are hill flockbooks so important?

- They will track various bloodlines (good ones and bad ones)
- Provide the information required to prevent inbreeding
- Protect the integrity & purity of regional/local strains of hill sheep populations
- Open the door to performance recording and receiving €uroStar evaluations

SIS laying the initial foundations for flockbooks

SIS encourages hill ram breeders (who are active members of an existing hill ram breeding group) to genotype the hill rams that they intend to sell in 2023 and beyond. To become SIS eligible this saleable rams must successfully matched to their sire (father) via genotyping. This requires all sires within hill ram breeder flocks to be genotyped also.

This hill genotyping, which is concentrating on sires for now, will provide fantastic information to all hill farmers. As the generations of sire ancestry build over time, farmers will have certainty about what bloodlines they can

Genomics is now offering a solution to this hill parentage issue. Once a DNA sample is collected from a lamb and both of its parents, genomic technology can assign parentage with 100% accuracy based on this DNA information. As of July 2023, the count of genotyped hill stock rams and their potential progeny had surpassed 3,000 and continues to rise rapidly. To accelerate the availability of SIS eligible hill rams for 2023, Sheep Ireland have organized DNA collection days for hill ram breeding groups all over Ireland. The genotyping of stock rams has been made available free of charge to further encourage early uptake, while the genotyping of other hill animals is being subsidized by Sheep Ireland to reduce costs for participating hill ram breeders.

Any hill ram breeder (who is currently a member of a recognized hill ram breeding group) who would like to genotype their rams should contact make contact with Sheep Ireland (www.sheep.ie).

Bord Bia Sponsorship Acknowledgment

Sheep Ireland would like to acknowledge Bord Bia's sponsorship of this publication. Bord Bia continue to grow Ireland's Quality Assurance scheme participation for the benefit of our sheep industry.

- 12,096 Quality Assured sheep farmers now produce 70% of Irish sheepmeat throughput (see page 9 for more info).
- Irish sheepmeat exports are now valued at over €470 million (based on 2022 data).

Lowland Ram Breeders

Only pedigree ram breeders that are current members of a sheep breed society and are current LambPlus members with 2023 born, performance recorded lambs are included in this directory. This directory is organised by Sheep Breed, then county, then breeder surname (all in alphabetical order).

Hill ram breeders (Genotyping with Sheep Ireland)

Only hill ram breeders that are current members of a hill ram breeding group and that have genotyped hill rams in their flock at the time that this publication went to print are included in this directory. View our online ram search www.ramsearch.ie for a completely up to date list of breeders (including those that may have genotyped hill rams since this publication was printed). This directory is organised by Sheep Breed, then county, then breeder surname (all in alphabetical order).

Finding SIS eligible Rams

Ram Search

Go to www.ramsearch.ie. Here Search for Rams by Breed, Age, Star rating, Location, SIS Eligibility and much more. You can also search the Tag number of any ram to assess their SIS eligibility.

Society Sales

Most society sales will have their catalogues generated via the Sheep Ireland database this year. In these catalogues, rams that are SIS eligible will be clearly identified with a SIS Eligible symbol.

Scan me for quick access to the Ram Search and Breeder Search
