Issue 11 2024

Chairperson's Message

In the past number of months, Denis Carroll has been elected as the new chairperson of the Sheep Ireland board taking over from Alex Clarke.

“Over the past year Sheep Ireland have made significant strides in leading several positive developments for the Irish sheep genetic improvement programme.

Through the implementation of the DAFM Sheep Improvement Scheme (SIS) Genotyped ram option, sheep breed improvement has been taken to a new level. Genomic technology provides more comprehensive breeding values and provides sheep farmers with the resources to make more informed breeding decisions, in turn driving progress in the national flock. At the end of 2023, Sheep Ireland reached a milestone, by surpassing 100,000 sheep genotypes. These advancements have been possible thanks to the efforts of ram producers and farmers and with the support of key stakeholders such as DAFM, Teagasc, Meat Industry Ireland and Ireland's sheep breed societies.

As we look to the future, the vision for Sheep Ireland remains ambitious and forward-thinking in utilizing the latest research and technology to identify and promote the use of more profitable and sustainable genetics to increase profitability for Irish sheep farmers.

Denis Carroll farms a commercial sheep and dairy farm with his family near Killarney Co. Kerry.

“

I want to thank our previous chairman Alex Clarke for his hard work and commitment in his role as chairperson of Sheep Ireland and I look forward to working with the board and staff to build on the tremendous progress made so far”

”

**Data sourced from Sheep Ireland Central Progeny Test (commercial) flocks.*

Understanding the EuroStars 2024

CPT Sire - This ram was progeny tested in the Sheep Ireland CPT (Central Progeny Test) and a large volume of commercial data is contributing to its genetic evaluation.

Flock DQI - Data Quality Index scores flocks on their data quality, quantity and timeliness.

M&F Scanned - This flock has been visited by Sheep Ireland and lambs have been weighed and scanned for Muscle & Backfat.

Animal Details

Replacement (€3.77) - If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

Lamb Survivability - This ranks animals based on lamb survival rate. Every positive % point on this index is an extra lamb surviving to 48hrs after birth.

Days to Slaughter - This ranks animals on their genetic ability to grow. This trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other.

Comment: Sire of this ram was Premier Champion 2021

Parentage DNA Verified - Where this message is displayed on a catalogue, the sheep in question has been genotyped and its parentage has been proven to be accurate based on its DNA. Both parents need to be genotyped to allow parentage verification to take place.

Scrapie - This indicates the level of scrapie resistance based on the animals genotype. This scrapie result is DAFM approved for export once the animal is fully parentage verified.

Genotyped - This animal has been genomically tested via Sheep Ireland. A genotyped animal will have a genomic evaluation which significantly improves the accuracy % of the €uroStar indexes.

Commercial Data - This animals genetic evaluation contains commercial farm data collected from Sheep Ireland/Teagasc projects or other commercial farms.

SIS: Yes - Indicates that a ram is eligible for the DAFM Sheep Improvement Scheme

Acc - See next page to see the importance of 'Acc%' which is an abbreviation of Accuracy.

Terminal (€1.66) - If a farmer desires a ram to breed only lambs for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability and Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have. This € value is an across breed value, so different breeds can be compared to each other.

No. of Lambs Born - This ranks animals based on the predicted litter size of their daughters.

Daughters Milk - This ranks animals based on the predicted weight difference of their lambs based on the milking performance of their daughters compared with other animals of the same breed.

Key elements of the €uroStar Indexes

Accuracy % - Key figure

The accuracy % attached to €uroStar evaluations is an extremely important piece of information that farmers should pay a lot of attention to. Accuracy % is displayed for each individual index and represents the amount of data behind that specific index. Where Accuracy % is Poor (less than 35%) a considerably lower emphasis should be placed on the evaluation information, however where Accuracy % is very good (70%+) a considerable emphasis can be placed on the evaluation when making a breeding decision.

Top tips on Accuracy%

- Purchase rams with as high an accuracy% as possible
- Purchase genotyped rams as these will have higher accuracy%
- Purchase from high Data Quality Index (DQI) LambPlus ram breeders
- Purchase rams that have Central Progeny Test (CPT) data in their background.

DQI - Data Quality Index

The Data Quality Index (DQI) scores LambPlus flocks on the quality, quantity, and timeliness of their data recording throughout the year. The DQI

appears as a % figure on all €uroStar sale catalogues and on the Sheep Ireland online breeder and ram search found at www.sheep.ie.

The three main elements of the DQI are as follows:

- **Quality** - Does the data demonstrate realistic variation across the various traits being recorded, ie lamb mortality, lambing difficulty, lamb weights etc. For all traits, there are expected levels of variance and these are a great indicator of data quality.
- **Quantity** - Has the breeder recorded all the required data for their flock, ie lambing information for all

ewes, weights for all lambs born etc. Thorough data recording is beneficial to the users of the €uroStars as it maximise the accuracy % of the indexes.

- **Timeliness** - Has the breeder submitted their data to Sheep Ireland in a prompt manner. Prompt entry of data to Sheep Ireland reduces the risk of data error and/or loss. Late data entry has the potential to cause index movements moving into the ram sale season which is very undesirable for both ram breeders and ram buyer alike.

Physical checks and €uroStars must go hand in hand – Ram NCT

Regardless of what €uroStar Index a ram may have, if the ram is not physically correct, he will not perform as he should. All farmers should carry out a ram NCT (check) on all existing stock rams and rams being considered for purchase. There are five basic 'T's' that all sheep farmers should look at:

1. Timing - Handle all farm rams 10-12 weeks prior to breeding to identify any potential problems. This will allow time to address issues that might be present.

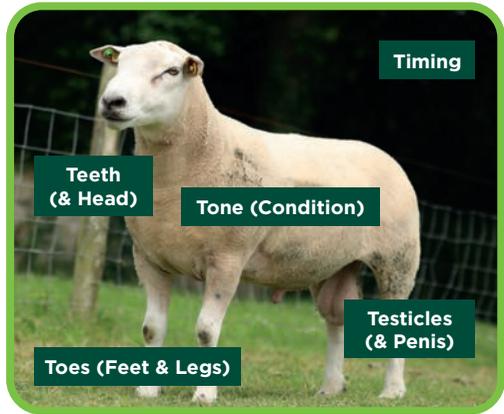

2. Tone - A ram should be in good condition (target BCS of 4) in advance of mating. Giving access to good grazing or feeding some level of concentrates may be advised if rams are under condition.

3. Teeth - All breeding rams' teeth should be checked annually. Culling should occur where issues are identified. Avoid retaining females from such rams were possible

4. Toes - Address lameness issues early. Cull persistently lame rams. Strictly avoid breeding replacements from rams with lameness issues. Check lame rams for sores on their chest. Sores in this area may prevent rams from mating ewes.

5. Testicles - Handle testicles to ensure they are free from injury/swelling. Check the general penis area for signs of injury and infection also.

**Handling rams can be dangerous given their size. The above checks can be carried out without turning over rams and risking back injury. Best advice is to have some help at hand to restrain rams while the above checks are being undertaken.*

Final Physical Check

Spend time watching rams with the ewes. Ensure rams are successfully mating with the ewes. All breeding rams should be raddled on their chest area or fitted with a crayon harness to mark each ewe as they are being mated. These raddle/crayon colours can then be changed on the ram/s in advance of the ewes second oestrus cycle (day 14/15 after initial ram introduction). A high number of ewes being marked by the second raddle/crayon will help to identify a fertility issue. Speak to your agricultural advisor about any breeding issues that you may be having on your farm.

Ram Purchasing Advice

Michael Gottstein – Head of Teagasc Sheep Knowledge Transfer

Ram buyers should manage purchases very carefully in the initial weeks. A change of environment and feed can cause upset for any animal, especially for young animals. As a result, management of newly purchased rams needs to be optimal.

Practical tips when buying rams

- **Buy early** - Allow rams some time adjust to their new surroundings and feed. If using rams as a team in one group of ewes, they should be familiar with each other rams in advance of mating.
- **Ram history** - Talk to the seller of your ram. Ask about health treatments, vaccinations, any specific farm issues, lameness etc.
- **After purchase care** - Quarantine the ram for a period to assess for diseases such as CODD, scab etc. Treat any purchased sheep for stomach worms/scab with two injections of Ivermectin, 7 days apart and a fourth-generation wormer (Zolvix/Startect) to prevent the importation of anthelmintic resistant worms. On wet farms a double treatment for fluke (two different products effective against immature fluke) will also help to guard against anthelmintic resistant liver fluke.
- **Vaccinate** all purchased rams against Clostridial diseases and pasteurella as per your own flock health protocol. Do not assume that the previous owner has done this. This will require two injections four to six weeks apart. One dead ram will pay for a lot of vaccine.
- **Feeding** - The ram is very likely to have been fed concentrates in advance of sale (discuss with the seller). If a ram has been fed before sale, this feeding

should continue for a period and wean off gradually.

- **Fertility** - To identify fertility issues raddling the chest of the ram is critical. Use a crayon and harness or raddle paste. Change colour every 7-14 days to detect ram fertility problems ASAP. Ideal colour sequence is Yellow, Orange, Green, Red, Blue and finally Black. Bucket feeding rams will facilitate applying raddle more easily, reducing the need to unnecessarily disturb ewes.
- **Fertility contd.** - A raised body temperature will kill any semen in the testes. Antibiotic treatment will not kill semen but will help to address the infection which is causing a high temperature. It can take semen up to 8 weeks to replenish if killed by a high temp.
- **Ram to ewe ratios** - Typically ram lambs should not be overworked in their first year, mating with no more than 25 ewes (hogget rams up to 40 ewes). Avoid running ram lambs alongside mature rams as this may risk injury and/or bullying.
- **Existing rams on the farm** - Carry out a physical assessment/NCT well in advance of mating (12 weeks or more). Ask yourself; what rams will I need this year? Can I avoid inbreeding using my current rams? Are all current rams fit for purpose (in good health etc)? Rams in poor condition will take considerable time to build body weight, so time is critical.

Become Quality Assured with Bord Bia

Bord Bia provides proof to customers of the high standards of Irish beef and sheep farming through farmer membership of the Sustainable Beef and Lamb Assurance Scheme (SBLAS).

An increase in the number of Quality Assured sheep farms would ensure sufficient supplies of Quality Mark lamb all year round.

For that, we need your participation.

Speak to Bord Bia today, to join the SBLAS and become Quality Assured.

Call the Bord Bia Helpdesk: 01 524 0410

Open Monday to Friday, 9am to 8pm.

Visit: farm.bordbia.ie

70% of eligible sheep are Quality Assured.

66% of shoppers* said they were more likely to buy lamb that carried the Bord Bia Quality Mark.

IRISH FOOD BOARD

A New Era for Hill sheep breeding

Sheep Ireland are now working with 17 hill ram breeding groups around Ireland to help accelerate hill sheep breed improvement. Establishing flockbooks (ancestry recording) remains the objective and the DAFM Sheep Improvement Scheme recognise that hill flockbooks are the critical first step to helping hill breeders to make similar genetic gains to those being achieved in our lowland sheep sector.

Since the launch of the SIS, progress on hill breed improvement initiatives has been rapid. Sale season 2023 saw a hill specific ram sale catalogue developed which was used at the majority of hill ram group sales throughout Ireland. Hill ram genotyping has recently surpassed the 6,000 ram mark with this figure set to grow significantly again this year.

The ability of DNA to accurately identify the parentage of rams being sold annually opens many possibilities for the hill sector with the establishment of flockbooks similar to our lowland breeds being priority number one.

Why are hill flockbooks so important?

- They will track various bloodlines (good ones and bad ones)
- Provide the information required to prevent inbreeding
- Protect the integrity & purity of regional/local strains of hill sheep populations
- Open the door to performance recording and receiving hill EuroStar evaluations

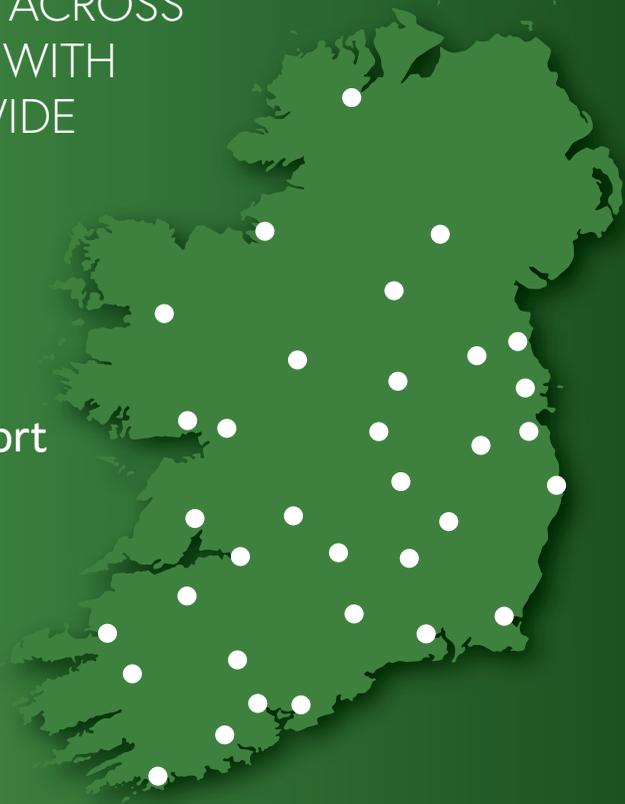

SIS laying the initial foundations for flockbooks

The DAFM SIS has helped to lay the foundations for Irish hill flockbooks by encouraging the genotyping of hill rams at a large scale around Ireland. Hill ram breeders that are current members of a hill ram breeding group/association should contact Sheep Ireland today to arrange to get their hill rams genotyped and SIS eligible.

Sheep Ireland Hill Ram Sale 2024

Since 2009 Sheep Ireland have hosted an annual multibreed EuroStar ram sale. This year's sale will take place on the fourth Saturday of August (24th) in Tullamore mart, Co. Offaly. This high index ram sale has had a major effect on Irish sheep breed improvement over the years acting as a major promotion of the EuroStar evaluations. It has also helped to grow performance recording among Irish pedigree ram breeders who have seen the interest in genetic improvement and indexes among Irish sheep farmers grow year on year.

This year we were delighted to announce that we will play host to a Hill Multibreed sale in Manorhamilton Mart, Co. Leitrim on October 11th. This will hopefully prove to be a marquee moment in Irish Hill sheep breed improvement. The sale will consist exclusively of genotyped hill rams. All rams will be sire verified (their sire will be known) via DNA analysis thus will be Sheep Improvement Scheme (SIS) eligible.

The number of hill ram breeders now engaged in genotyping of their saleable rams is fantastic to see. This genotyping has now provided the foundation upon which individual hill flockbooks (ancestry recording) can be established. In turn flockbooks will allow the generation of hill EuroStar indexes similar to our lowland sheep breeds. It is now critical that commercial hill sheep farmers lend support to the efforts of Ireland's hill ram breeders. This can be done by sourcing sire verified rams this coming breeding season.

The Sheep Improvement Scheme (SIS): Genotyped Ram Action

The DAFM Sheep Improvement Scheme (SIS) Genotyped Ram Action has presented a massive opportunity for the entire Sheep Industry to accelerate sheep breed improvement for the next number of years.

For the Lowland sector, it will build on progress made over the last decade. The SIS will drive the rate of genetic gain by increasing the demand for animals with 4 or 5 Stars. With all the

rams also needing to have a genomic evaluation, ram buyers can now be more confident than ever in the Eurostar ratings of rams.

For the hill sector, the SIS has helped to establish a baseline in parentage recording, something that has been absent to date. Parentage recording is the bedrock from which the sector can apply systematic breed improvement and monitor inbreeding.

For farmers that need to complete the SIS ram task this year, pay attention to the points below:

Lowland Flock scheme participants:

1. The Ram must be 4/5 Stars on the Replacement or Terminal Index at the time of purchasing
2. The Ram must have a Genomic Evaluation
3. The Ram must be Scrapie Type 1/2/3
4. The Ram must be purchased in the year the task is completed.

Hill flock scheme participants:

1. The Ram must be DNA Sire Verified by Sheep Ireland
2. The Ram must be a Hill Ram (Blackface Mountain or Cheviot Type)
3. The Ram must be Scrapie Type 1/2/3
4. The Ram must be purchased in the year the task is completed.

NOTE: *The Lowland option is also available to Hill Flocks*

Hill Breeder Directory 2024

Only hill ram breeders that are current members of a hill ram breeding group and that have genotyped hill rams in their flock at the time that this publication went to print are included in this directory. View our online ram search www.ramsearch.ie for a completely up to date list of breeders (including those that may have genotyped hill rams since this publication was printed). This directory is organised by Sheep Breed, then county, then breeder surname (all in alphabetical order).

Finding SIS eligible Rams

The screenshot shows the RamSearch website interface. At the top, there are tabs for 'Rams', 'Flockbook Animals', and 'Breeders'. Below the tabs is a search bar with the text 'Search by Ram ID'. To the left of the search bar is a map of Ireland with a green highlight over the southern region. On the right side, there are several filter options: 'Breed' (set to 'Belclare'), 'Age' (set to 'All age'), 'SIS eligible' (checked), 'Bred by CFT Sires only' (unchecked), and 'Genotyped only' (unchecked). Below these filters are two search options: 'Search by EuroStars' and 'Search by Values'. There are also several horizontal sliders for 'Replacement Index', 'Terminal Index', 'No. of Lambs Born', 'Daughters Milk', 'Lambing Survivability', and 'Days to Slaughter', each with a star rating. At the bottom, there is a table with 8 columns: 'Ram', 'Breed', 'DOB', 'Region', 'Owner', 'Replacement', and 'Terminal'. The table shows two results for 'Belclare' rams.

Ram	Breed	DOB	Region	Owner	Replacement	Terminal
#0455699009884	Belclare	16-FEB-2023	Limerick	William O'Riordan	★★★★★ €10.01	★★★★★ €3.50
#0450791013720	Belclare	01-JAN-2024	Cork	Michael Connors	★★★★★ €9.65	★★★★★ €3.20

RamSearch

Go to www.ramsearch.ie. Here Search for Rams by Breed, Age, Star rating, Location, SIS Eligibility and much more. You can also search the Tag number of any ram to assess their SIS eligibility.
